

Clippen voor left plane

$\Rightarrow$ "punten op left plane hebben zelfde geprojecteerde x-coördinaat"

$$d_{val} \rightarrow \boxed{x' = \frac{x_E \cdot d}{-z_E}}$$

$$S = pA + (1-p)B$$

$$\left\{ \begin{array}{l} p \text{ bepalen;} \\ \frac{(px_A + (1-p)x_B) \cdot d_{near}}{pz_A + (1-p)z_B} = d_{val} \end{array} \right.$$

$$d_{val} = -\text{breedte near plane} / 2$$
