

Spiegelend Licht.

Dijous:

Licht weerkaatst
in alle richtingen

Spiegelend Licht:

Licht wordt voornamelijk in reflectierichting r
weerkaatst.

Berekening:

$$(r_R^s i_R^s, r_G^s i_G^s, r_B^s i_B^s) \cdot \cos(\beta)^{m_s}$$

Phong
reflection

$\Rightarrow m_s$ input parameter (> 0): Hoe groter m_s ,
hoe sterker spiegeleffect.
