

Advanced Programming - Overview

Brent van Bladel

Who am I?

Universiteit
Antwerpen

Teaching this course

Monday

Theory Lectures: Mondays 10h45 – 12h45
CMI Room A.143

Mail: Brent.vanBladel@uantwerpen.be

C++ Software Engineer

Tuesday - Friday

No Practical Sessions

Exercises - Individual

When: Thursdays 10h45 - 12h45 (or any time that is convenient)

Point of contact

Guillermo guillermo.perez@uantwerpen.be

Where: M.G.106a

When: Mondays, Wednesdays, (and most) Fridays
10:00 - 15:00

Course Overview

Week	Theory	Relevant Exercises
29 September	Chapter 1: Basic Concepts Chapter 2: Functions & Namespaces	Session 0
6 October	Chapter 3: Memory Chapter 4: Classes & Memory	Session 1 Session 2
13 October	Chapter 5: Advanced Memory	Session 3
20 October	Chapter 6: Class Design Chapter 7: Class Derivation	Session 4 Session 5
27 October	Chapter 8: Design Patterns	Project
3 November	Chapter 9: Multi-threading	Session 6
10 November	Chapter 10: Generic Programming	Session 7 Session 8

Evaluation

- 50% Theory Exam
 - Questions about code snippets:
 - Be able to determine the expected result
 - Discuss the benefits and drawbacks
 - Discuss the design
- 50% Project

You need to pass each part in order to pass the course!

Course Material

Required

- Lecture Slides
- “The C++ Programming Language” - Stroustrup

Optional

- Course Notes by Prof. Broeckhove
- “Effective Modern C++” - Scott Meyers
- “A Tour of C++” - Stroustrup
- <http://en.cppreference.com>
