

3D-L-systemen:

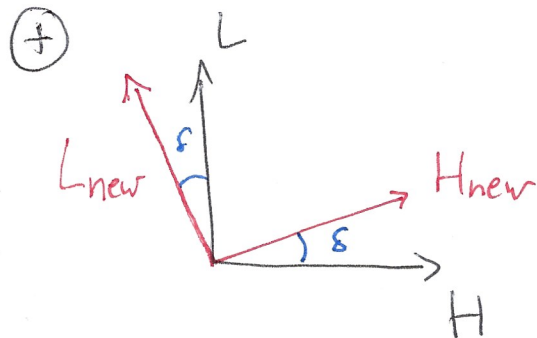

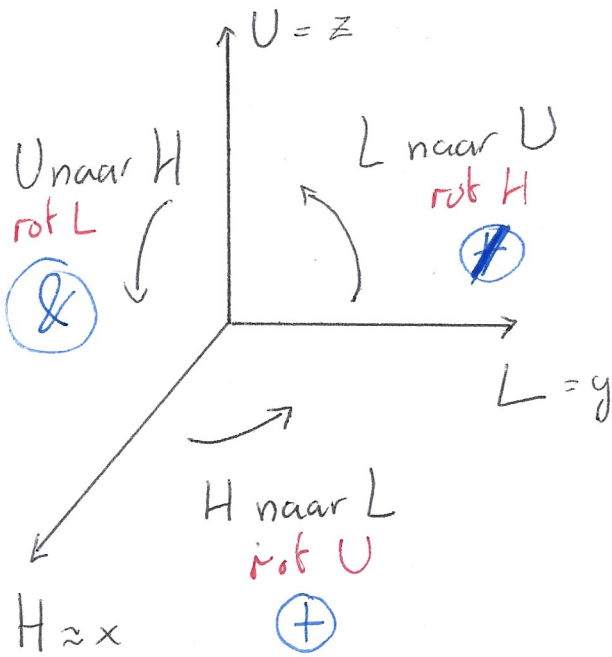

Speciale symbolen

$+$, $-$: rotaties om U-as

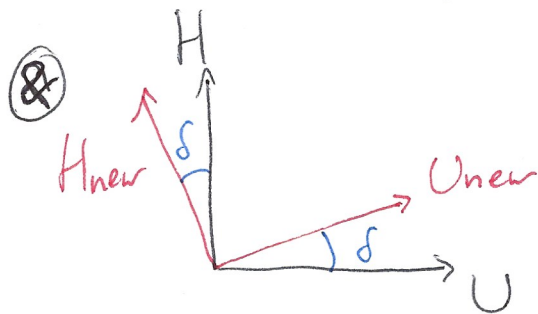

$\wedge$, $\&$: rotaties om L-as

$\approx$ $\backslash$, $/$: rotaties om H-as

$|$: omkeren van richting

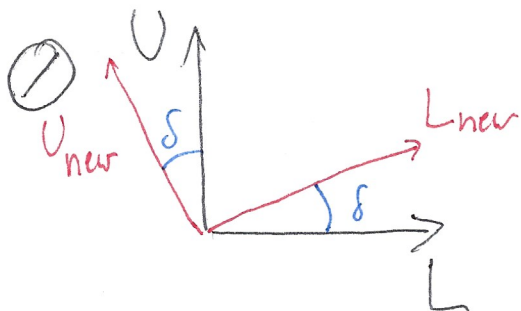

$$\begin{cases} H_{\text{new}} = H \cos \delta + L \sin \delta \\ L_{\text{new}} = -H \sin \delta + L \cos \delta \end{cases}$$

$$\begin{cases} H_{\text{new}} = H \cos \delta + (-U \sin \delta) \\ U_{\text{new}} = U \cos \delta + H \sin \delta \end{cases}$$

Opm: in cursus notas staan formules voor $\wedge$ (dus $\delta \rightarrow -\delta$)

$$\begin{cases} L_{\text{new}} = L \cos \delta + U \sin \delta \\ U_{\text{new}} = -L \sin \delta + U \cos \delta \end{cases}$$

Opm: en cursus notas staan formules voor $\backslash$ (dus $\delta \rightarrow -\delta$)
